

# **SOURCES** Fire Retardant Treated Wood

Many Treater Members of Western Wood Preservers Institute produce and/or distribute fire retardant treated wood products for multifamily and commercial construction. The fire retardants are infused deep into the wood through pressure treatment to provide the necessary fire protection.

Contact these companies to purchase fire retardant lumber and plywood products. Some offer multiple brands of fire retardant treatment products. For technical information, review the brands and website links for specific fire retardants.
